PROFESSIONAL SUMMARY

Full-Stack and Software Developer with experience designing and deploying full-stack, cross-platform, and real-time systems within institutional production environments. Skilled in API architecture, desktop application development, UI modernization, and database reconstruction. Strong focus on scalable system design, workflow optimization, and delivering reliable solutions under live operational constraints.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C#, SQL

Frontend: React, React Native, HTML, CSS, Tailwind

Backend: Flask, Socket.IO, Node.js, Express, Spring Boot, GraphQL

Desktop: PyQt5

Databases: PostgreSQL, MongoDB, Firebase

Tools & DevOps: Git, Docker, ngrok, Postman, VS Code

Concepts: REST APIs, Real-Time Systems, OOP, MVC Architecture, Authentication, Microservices

PROFESSIONAL EXPERIENCE

Student Ambassador & Junior Software Developer, George Brown College | **Oct 2025 – Present**

- Leading development and deployment of 5 internal software systems supporting institutional operations and live academic events.
- Engineered **AcademicPDF**, a Python (PyQt5) desktop application that processes students' degree work transcripts, extracts desired content, and regenerates formatted summary reports through automated analysis workflows.
- Modernized the **Student Awards Slide Display System** by redesigning the UI for non-technical staff, migrating deployment from server-hosted architecture to secure localhost execution, and engineering a real-time multi-device scholarship display system (Flask, Socket.IO)
- Contributing to the reconstruction and optimization of **George Brown Polytechnic pathway database systems**.

PROJECTS

GlamUp! – Cross-Platform Beauty Services Application, React Native | Firebase

- Designed and developed a cross-platform mobile and web application connecting clients with freelance beauty professionals (nail artists, lash technicians, makeup artists).
- Identified and addressed a market gap by providing an affordable, flexible alternative to traditional salon-based services.
- Implemented authentication, role-based user flows, and real-time booking logic using Firebase.
- Built scalable UI components and structured backend logic to support long-term platform growth and increased professional visibility.

ADDITIONAL EXPERIENCE

Beauty Expert, Shoppers Drug Mart | Toronto, ON

- Delivered high-volume client service, trained new team members, and supported inventory and merchandising operations.

Designer Assistant & Operations Support, Fatal Envy Apparel | Toronto, ON

- Supported e-commerce operations, content creation, scheduling, and brand logistics coordination.

EDUCATION

Advanced Diploma, Computer Programming & Analysis | George Brown Polytechnic (Expected 2026)

Diploma, Fashion Techniques & Design | George Brown College (April 2016)
