# 1 Introduction

This Project Vision Document provides a comprehensive overview of the GlamUp! Online Beauty Services App. Its purpose is to align all stakeholders by clearly stating the project's scope, assumptions, constraints, and requirements.

The **GlamUp! App** is an innovative platform that connects clients with freelance beauty professionals—including nail artists, lash technicians, and makeup artists. It addresses challenges faced by both clients (rigid schedules, high salon costs, lack of inclusivity) and professionals (limited visibility, inconsistent bookings, reliance on messy social media systems).

By consolidating booking, payments, profiles, and reviews into one trusted platform, GlamUp! benefits:

- Clients who want convenience, affordability, flexibility, and trust.
- Beauty professionals who want visibility, reliable scheduling, and secure income.
- Administrators who ensure compliance, handle disputes, and manage growth.

This document draws upon detailed personas, user stories, and high-level requirements to create a clear vision of how GlamUp! will deliver value.

## 1.1 Purpose

The purpose of this Vision Document is to:

- Define the **vision** and **scope** of GlamUp!.
- Identify **stakeholders and users** and explain their needs.
- Translate **personas and stories** into system requirements.
- Provide the foundation for the **design, development, and testing phases**.

## 1.2 Scope

The GlamUp! App will serve as a marketplace platform where clients can find, book, and pay freelance beauty service providers specializing in nails, hair and makeup services.

### 1.2.1 In Scope

#### ☒ Client Features:

- Account creation and management.
- Search and filter for professionals by service type, location, price, and rating.
- View artist profiles with portfolios, reviews, and pricing.
- Appointment booking, management, and payment.

- Secure in-app messaging and communication.
- Ratings and reviews after service.

#### ☒ Professional Features:

- Profile creation with portfolio, pricing, and services.
- Real-time availability management.
- Booking confirmations, deposits, and reminders.
- Payment management, income tracking, and promotions.
- Private communication with clients.
- Review and reporting functions.

#### ☒ Administrative Features:

- Artist verification and compliance management.
- Analytics dashboards for platform monitoring.
- Dispute management tools.
- Financial monitoring and reporting.
- Content moderation and category management

#### 1.2.2 Out of Scope

- Physical salon management systems.
- Inventory or supply chain systems for beauty products.
- Non-beauty services (e.g., fitness trainers, wellness coaches).

### 1.3 Definitions, Acronyms, and Abbreviations

| Term                                 | Explanation                                                                                                                        |
|--------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| App                                  | Mobile Application (Android/iOS)                                                                                                   |
| Freelance Artist                     | Independent beauty provider (nail artist, lash tech, makeup artist).                                                               |
| Client                               | User booking beauty services via GlamUp!.                                                                                          |
| MVP                                  | Minimum Viable Product: earliest version of the app with essential features to test and validate the concept.                      |
| PCI-DSS                              | Payment Card Industry Data Security Standard; security standards to ensure safe handling of cardholder information during payments |
| GDPR                                 | General Data Protection Regulation; European Union regulation for protecting personal data and privacy of individuals              |
| Admin                                | Operations, customer service, or finance staff managing the platform.                                                              |
| App Store Regulations (Apple/Google) | Policies required for app approval and distribution.                                                                               |

## 2 Positioning

### 2.1 Business Opportunity

The beauty industry is undergoing rapid digital transformation, with increasing demand for on-demand and at-home services. Consumers—especially younger demographics, busy professionals, and new parents—are seeking flexible, affordable, and personalized alternatives to traditional salons. At the same time, freelance beauty professionals are growing in number but often rely on informal channels like social media DMs, which limit visibility, professionalism, and income stability.

GlamUp! bridges this gap by providing a trusted marketplace where clients can conveniently find, book, and pay verified freelance professionals for services such as nails, lashes, and makeup. This creates an opportunity to capture market share in a growing gig economy while supporting freelance professionals with digital tools that elevate their business.

### 2.2 Problem Statement

| Problem                                 | GlamUp! Solution                                                                        |
|-----------------------------------------|-----------------------------------------------------------------------------------------|
| Rigid salon schedules                   | On demand booking with flexible availability                                            |
| High service costs                      | Affordable freelance pricing with transparent rates                                     |
| Limited accessibility                   | At-home or nearby freelance services through location-based search                      |
| Difficulty finding the right match      | Advanced search & filter (by service, price range, rating, availability, location)      |
| Lack of trusted freelance options       | Verified profiles, portfolios, and reviews in one platform                              |
| Difficulty comparing professionals      | Side-by-side comparison of services, ratings, and prices                                |
| Inconsistent booking methods            | Centralized booking, reminders, and secure in-app communication                         |
| Low visibility for beauty professionals | Professional profiles, ratings, reachability, and promotional tools to grow client base |
| Insecure or inconvenient payments       | Built-in, PCI-compliant in-app payment system with receipts & deposits                  |
| Client concerns over safety/privacy     | Admin verification, dispute resolution, and GDPR/PCI compliance                         |

Table 1 Problem Statement

## 2.3 Product Position Statement

|                        |                                                                                                                                                        |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>For</b>             | busy professionals, students, new mothers, and individuals — including men — seeking convenient, affordable, and personalized nail and beauty services |
| <b>Who</b>             | struggle with rigid salon schedules, high costs, lack of trusted freelance options, or discomfort in traditional salon environments                    |
| <b>The GlamUp! App</b> | is an on-demand beauty services marketplace                                                                                                            |
| <b>That</b>            | connects clients with freelance nail and beauty artists, enabling easy booking, secure payments, and reliable reviews all in one place                 |
| <b>Unlike</b>          | traditional salons or unverified social media bookings                                                                                                 |
| <b>Our product</b>     | provides flexibility, inclusivity, affordability, and trust through a user-friendly platform designed for modern lifestyles                            |

Table 2 Product Position Statement

## 2.4 SWOT Analysis

<Reference: <https://www.businessballs.com/strategy-innovation/swot-analysis/>>

| <b>Strengths</b>                                                                                                                       | <b>Weaknesses</b>                                                         |
|----------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|
| Convenient on-demand booking with flexible scheduling                                                                                  | Reliance on freelance availability may cause inconsistent service quality |
| Affordable, transparent freelance pricing                                                                                              | Limited brand recognition as a new startup                                |
| Advanced search & filtering tools that match clients with the right professionals                                                      | Dependent on freelancers to maintain accurate profiles and availability   |
| Verified professional profiles with portfolios and reviews                                                                             | Requires strong trust-building to overcome user hesitancy                 |
| Secure, PCI-compliant in-app payments                                                                                                  | Initial geographic scope limited (e.g., Canada at launch)                 |
| Inclusive and discreet services for diverse clients (e.g., men, new mothers, people with disability, clients from marginalized groups) | Requires ongoing moderation and admin oversight                           |
| <b>Opportunities</b>                                                                                                                   | <b>Threats</b>                                                            |
| Growth of gig economy and rising demand for beauty services                                                                            | Competition from established salon booking apps or local platforms        |
| Expansion into other beauty services (hair, skincare, spa etc.)                                                                        | Trust concerns with freelancers compared to established salons            |
| Partnership with beauty schools, influencers, and product brands                                                                       | Regulatory or compliance changes (payments, privacy, gig work laws)       |
| Potential for loyalty programs, referral campaigns, and seasonal promotions                                                            | High marketing costs required for adoption in a competitive market        |
| Scaling to international markets after successful regional launch                                                                      | Risk of imitation by larger competitors with stronger funding             |

### 3 Stakeholder and User Descriptions

This section provides a profile of the primary stakeholders and users involved in the GlamUp! Online Beauty Services project. Each group has unique roles and important points that justify the system's development. By understanding these perspectives, we can design a solution that meets real needs, not just theoretical ones.

- Clients represent the end-users who book services through the platform. They are motivated by convenience, affordability, and trust, but currently face challenges such as rigid salon schedules, high costs, and inconsistent quality. Their satisfaction drives demand and adoption of the app.
- Beauty Professionals represent the supply side of the marketplace, including freelance nail artists, lash technicians, and makeup artists. They are skilled providers who need visibility, structured booking tools, and secure income management. Without GlamUp!, many rely on unorganized social media DMs, which limit their growth and professionalism.
- Administrators include operations, support, and finance staff responsible for maintaining compliance, safety, and smooth platform operations. They verify professionals, resolve disputes, oversee financial transactions, and manage service categories. Their work ensures the reliability of the app.
- Investors and Owners provide funding, strategic guidance, and monitor return on investment. They are key to ensuring long-term sustainability of GlamUp!.
- The Development Team translates user and business needs into a working system. They design, test, and maintain the app, ensuring it remains functional, secure, and user-friendly.

These stakeholders highlight the necessity for GlamUp! together: clients demand reliable services, professionals need business tools, and admins ensure safety and compliance. All of these stakeholders shape what the system needs to deliver.

#### 3.1 Stakeholder Summary

| Stakeholder Name     | Represents                          | Role                                                |
|----------------------|-------------------------------------|-----------------------------------------------------|
| Clients              | End-users                           | Book services, leave reviews, generate demand       |
| Beauty Professionals | Freelancers (nails, lashes, makeup) | Offer services, maintain profiles, manage schedules |
| Administrators       | Ops, support, finance               | Verify artists, manage disputes, monitor growth     |
| Investors/Owners     | Business stakeholders               | Provide funding and oversee ROI                     |
| Development Team     | Designers & Developers              | Build, test, and maintain GlamUp!                   |

Table 3 Stakeholder Summary

### 3.2 User Summary

| User Name      | Description                                                                                         | Responsibilities                                                                            | Stakeholder         |
|----------------|-----------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|---------------------|
| Anna Cooper    | 42, Marketing Manager with a demanding schedule; values efficiency and flexible last-minute booking | Books flexible appointments; manages her own bookings.                                      | Client              |
| Jessica Choi   | 20, College freshman, budget-conscious; part-time worker; loves self-expression through nail art    | Searches affordable artists; explores creative nail designs; books within a student budget. | Client              |
| Saba Hasan     | 38, Stay-at-home new mom; prefers at-home lash/beauty services due to childcare responsibilities    | Books repeat, trusted at-home services; ensures safe and personalized experiences.          | Client              |
| Trisha Gomez   | 25, Junior Developer; budget-conscious; analytical and structured decision-maker                    | Researches artists; compares reviews and ratings; books affordable services efficiently.    | Client              |
| Pierre Jacobs  | 30, Accountant; values discreet self-care; feels uneasy in traditional salons                       | Books nail/beauty services in private, comfortable settings; maintains privacy.             | Client              |
| Sofia Martinez | 29, Freelance nail artist; left salon to work independently; skilled but struggles with marketing   | Creates/manages profile; updates portfolio; schedules bookings; communicates with clients.  | Beauty Professional |
| Aisha Rahman   | 33, Lash technician; works from home studio; balances childcare with flexible availability          | Updates availability; accepts bookings; relies on reviews to build credibility.             | Beauty Professional |
| Daniel Kim     | 27, Freelance makeup artist; specializes in events; often receives last-minute requests             | Sets custom packages; manages bookings/payments; handles client messaging.                  | Beauty Professional |
| Sonia Lam      | 45, Operations Manager; ensures platform compliance and growth                                      | Verifies artists; monitors performance; manages disputes; oversees platform features.       | Admin               |
| Adam Rogers    | 27, Customer Service Agent; first point of contact for issues                                       | Provides customer/artist support; resolves disputes; manages communications.                | Admin               |
| Bella Cruz     | 38, Finance Specialist; ensures smooth and secure financial operations                              | Manages payouts; monitors transactions; ensures transparency and compliance.                | Admin               |

Table 4 User Summary

## 4 Stakeholder Requirements

| ID  | Requirement                                                                             | Stakeholder             |
|-----|-----------------------------------------------------------------------------------------|-------------------------|
| R1  | Clients need to create and manage accounts securely                                     | Clients                 |
| R2  | Clients require search and filtering options (by service, price, rating, availability). | Clients                 |
| R3  | Clients want to view professional profiles with portfolios, pricing, and reviews.       | Clients                 |
| R4  | Clients need to book and manage appointments directly in-app.                           | Clients                 |
| R5  | Clients require secure, cashless payment with receipts and deposits.                    | Clients                 |
| R6  | Clients and professionals need private messaging to clarify service details.            | Clients / Professionals |
| R7  | Clients want to leave ratings and reviews to build trust and accountability             | Clients                 |
| R8  | Professionals need to create and manage profiles, services, and pricing.                | Professionals           |
| R9  | Professionals need real-time booking and availability management.                       | Professionals           |
| R10 | Professionals require payment tracking, deposits, and income reporting.                 | Professionals           |
| R11 | Professionals need promotional tools to attract clients (discounts, offers).            | Professionals           |
| R12 | Professionals require tools to report unsafe or disrespectful clients.                  | Professionals           |
| R13 | Admins must verify professional accounts for legitimacy.                                | Administrators          |
| R14 | Admins need dispute management tools to resolve conflicts fairly.                       | Administrators          |
| R15 | Admins require financial oversight of payouts, refunds, and transactions.               | Administrators          |
| R16 | Admins need dashboards for monitoring growth and compliance.                            | Administrators          |
| R17 | Admins must be able to moderate and remove inappropriate/fraudulent profiles.           | Administrators          |
| R18 | Admins need tools to manage and update service categories.                              | Administrators          |

Table 5 Stakeholder Requirements

## 5 System Features

The system features of GlamUp! translate stakeholder requirements into actionable high-level capabilities. Each feature is tied to solving a pain point highlighted by users or admins.

| ID  | Feature                                                                                                                             | Stakeholder Requirement ID |
|-----|-------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| F1  | <b>Account creation &amp; authentication</b><br>Allows clients and professionals to securely register, log in, and manage profiles. | R1, R8                     |
| F2  | <b>Search &amp; filter engine</b><br>Lets clients quickly find professionals by service, price, rating, or availability.            | R2                         |
| F3  | <b>Professional profile system</b><br>Displays portfolios, services, pricing, and reviews for client decision-making                | R3, R8                     |
| F4  | <b>Appointment booking &amp; scheduling</b><br>Provides in-app booking requests, confirmations, deposits, and reminders.            | R4, R9                     |
| F5  | <b>Secure payment gateway</b><br>Enables cashless transactions with deposits, receipts, and payout tracking.                        | R5, R10                    |
| F6  | <b>Messaging &amp; communication system</b><br>Offers private chat between clients and professionals to clarify service details.    | R6                         |
| F7  | <b>Ratings &amp; reviews system</b><br>Allows clients to leave feedback and professionals to build reputations.                     | R7                         |
| F8  | <b>Admin verification tools</b><br>Lets administrators approve professionals to ensure legitimacy and safety.                       | R13                        |
| F9  | <b>Dispute management tools</b><br>Gives admins access to bookings, payments, and chats for fair conflict resolution.               | R14                        |
| F10 | <b>Financial reporting &amp; admin dashboards</b><br>Provides admins with insights into payouts, refunds, and platform activity.    | R15,R16                    |
| F11 | <b>Analytics dashboard for professionals</b><br>Shows professionals income trends, booking stats, and business growth.              | R10, R16                   |
| F12 | <b>Comparison tool for clients</b><br>Enables side-by-side evaluation of professionals by price, ratings, and services.             | R2, R3                     |
| F13 | <b>Promotions &amp; discount campaigns</b><br>Allows professionals to create offers to attract clients during slow periods.         | R11                        |
| F14 | <b>Automated reminders &amp; notifications</b><br>Sends appointment confirmations and reminders to reduce missed bookings.          | R4, R9                     |
| F15 | <b>Reporting &amp; moderation tools</b><br>Lets professionals report unsafe clients and admins remove inappropriate profiles.       | R12, R17                   |

| ID  | Feature                                                                                                                   | Stakeholder Requirement ID |
|-----|---------------------------------------------------------------------------------------------------------------------------|----------------------------|
| F16 | <b>Service category management</b><br>Allows admins to create or update service categories (e.g., nails, lashes, makeup). | R18                        |

Table 6 System Features

## 6 Assumptions

- ☒ **Clients own modern smartphones and have stable internet access**, since the platform is mobile-first.
- ☒ **Freelancers are self-motivated** to keep their profiles, portfolios, and availability accurate.
- ☒ **Admin staff are available** to verify professionals, moderate content, and handle disputes.
- ☒ **Payment gateways remain reliable and PCI-DSS compliant**, ensuring secure financial transactions.
- ☒ **The MVP will include essential features** (client, professional, and admin functions), with enhancements planned in later phases.
- ☒ **Users are familiar with basic mobile app navigation**, reducing the need for extensive training.
- ☒ **Third-party APIs and integrations** (e.g., maps, push notifications, payment processors) remain available and stable.
- ☒ **Legal and regulatory environments remain consistent**, with no sudden changes to privacy, tax, or labor laws that impact app operation.
- ☒ **Professionals have access to tools (smartphones, internet, digital payments)** to operate their services through the app.
- ☒ **There will be sufficient early adoption** from both clients and professionals to validate the MVP.

## 7 Constraints

- ☒ **Budget & Time:** MVP delivery is targeted for **April 2026**, limiting scope and requiring prioritization.
- ☒ **App Store Compliance:** The app must meet **Apple App Store** and **Google Play Store** approval guidelines before release.

- ☒ **Security & Privacy:** The platform must comply with **PCI-DSS** for payment handling and **GDPR** for data protection.
  - ☒ **Freelancer Availability:** Service quality depends on independent professionals, which may lead to inconsistent user experiences.
  - ☒ **Platform Compatibility:** The app must support both **iOS and Android** devices, requiring cross-platform testing and design.
  - ☒ **Technology Stack Limitations:** The system will be built within the limits of chosen frameworks, databases, and APIs.
  - ☒ **Scalability at MVP:** The MVP may support a limited number of users and services; scaling will depend on post-launch resources.
  - ☒ **Geographical Scope:** Initial release may be limited to certain regions (e.g., Canada) due to legal and operational constraints.
  - ☒ **Resource Availability:** Development depends on the availability of skilled designers, developers, and QA testers within the set timeline.
  - ☒ **Brand & Marketing Limitations:** Promotion of the app may be limited by budget, affecting early adoption rates.
-
